DUTA INTEGRA SOLUTIONS SDN BHD - COMPREHENSIVE BUSINESS PLAN

Confidential Business Plan

Version: 2.0 - Comprehensive Edition (Investor & Internal)

Date: 21 August 2026

Company Registration: Duta Integra Solutions Sdn Bhd

Founded: 2021

Headquarters: Cyberjaya, Selangor, Malaysia (Tech Hub) | Operations: Hutan Melintang, Perak

Website: <https://dutaintegra.my>

Email: hello@dutaintegra.my

Phone/WhatsApp: +60 11-5403 4051

Founders: 100% Malaysian-Owned, Bumiputera Company

Industry: AI Software Development, Managed IT Services, Cloud & Cybersecurity

CRITICAL IP OWNERSHIP DECLARATION

All products, platforms, services, frameworks, codebases, designs, documentation, and intellectual property described in this business plan are 100% originally developed, owned, and maintained by Duta Integra Solutions Sdn Bhd.

- No third-party white-label reselling
- No franchise or licensing of external products
- No subcontracting of core AI/IT development
- All client projects are built on our proprietary stack (Next.js + Vercel + Neon + Drizzle ORM + Custom Auth)
- All four showcase products (Leish, Eastelpro, AGMX, DutaConnect) are owned by Duta Integra Solutions and serve as IP assets, case studies, and SaaS spin-off opportunities.
- This ownership gives us pricing power, margin control, and defensibility.

- Funding Requirements & Use of Funds (Optional)
- Appendices (Products Screenshots, Tech Architecture, Testimonials)

1. EXECUTIVE SUMMARY

The Problem: 1.17 million SMEs in Malaysia (97.4% of all businesses) contribute 38% of GDP but are digitally left behind. They face three simultaneous crises: (1) IT infrastructure is unreliable and no local partner answers 24/7, (2) leads are lost in WhatsApp chaos with no CRM, (3) AI feels expensive and foreign. Existing vendors force them to choose: hire a cheap IT shop with no AI skills, or a trendy AI agency with no IT support and no PDPA knowledge. Result: downtime, data leaks, missed sales, and failed digitalization grants.

The Solution: Duta Integra Solutions is an AI-first Managed IT partner built for Malaysian SMEs. We combine what others separate: Enterprise-grade AI systems + 24/7 Managed IT + Cloud + Security + PDPA + Sales Automation + Content & Ads — under three simple monthly retainers, month-to-month, no lock-in. Everything is built on our owned, zero-cost infrastructure (Vercel Edge ap-southeast-1 Singapore <40ms to MY + Neon Serverless PostgreSQL) so we pass savings to clients.

What We Have Built (Owned IP):

- 4 Live Products: Leish (beauty marketplace, 70% enquiry automation), Eastelpro (WiFi marketing & SIM platform, 99.9% uptime), AGMX (Malaysia's first AI-powered Cooperative AGM OS, 4-agent Governance Copilot), DutaConnect (community platform for Indonesians in MY - launching)
- 3 MRR Retainers: Foundation RM2k, Growth RM5.3k (most chosen), AI Partner RM8.3k+
- 1 Entry Product: Business Website RM2.5k (Merdeka RM775) -> natural bridge to retainers
- Custom Admin Dashboard: Lead pipeline with WhatsApp 1-click action, CSV export, AI Token Cost-Cap safeguard, RBAC (admin/staff/client), HttpOnly auth

Traction:

- Founded 2021 Cyberjaya, 100% Malaysian-owned, bootstrapped
- 5+ client projects shipped, 3 active retainers
- Stack proven: Vercel Hobby Tier + Neon Free Tier = RM0 infra cost at start, scales to paid only at growth

- PDPA-aware delivery, free audit, proposal in 3 working days

Market Opportunity:

- TAM: 1.17M SMEs x RM2k-8.3k MRR = RM28B+ annual potential in MY alone
- SAM: SMEs in Klang Valley, Selangor, Perak, digital-ready = ~100k businesses
- SOM (Year 1): 30 retainers = RM1.49M ARR (0.03% SAM)

Business Model: MRR-first. One-off websites are customer acquisition cost (CAC) paid by client, then converted to retainer. Gross margin 60-75% due to owned IP and serverless.

Financial Target (12 Months): RM124.5k MRR / RM1.494M ARR + RM140k one-offs = ~RM1.63M revenue. Path to RM5M ARR in Year 3 with 100 retainers + SaaS spin-offs.

The Ask: This plan is for internal scaling and optional seed grant/investor (MDEC, Cradle, SME Corp). We are not seeking to sell IP; we are seeking to amplify distribution of owned IP.

2. COMPANY OVERVIEW

2.1 History

Founded in Cyberjaya in 2021 during the post-pandemic digitalization push. Founder saw SMEs struggling to find a local partner who understood both technical depth and Malaysian business context (PDPA 2010, SST, ePerolehan, Bahasa Malaysia/English mix, WhatsApp-centric operations). Started as custom web + IT support, evolved into AI + IT combined when LLM APIs became viable in 2023-2024. Built first owned products (Eastelpro, Leish) as proof of capability, then productized service into retainers in 2025-2026.

2.2 Vision

To be Malaysia's most trusted AI + IT partner for SMEs by 2028 - powering 100+ businesses monthly and spinning off 3 owned SaaS products to regional markets.

2.3 Mission

Make AI and enterprise-grade IT accessible to every Malaysian SME - not just large corporations in KL - through transparent pricing, local expertise, and systems that last beyond go-live.

2.4 Core Values

- Clarity over Jargon: We explain in plain Malay/English. No tech theatre. Every proposal has scope, timeline, fixed price.
- Partnership, Not Transaction: Month-to-month retainers with monthly health reports. We don't disappear after launch; ongoing support is part of package.
- Speed with Substance: Free audit, proposal in 3 working days, weekly check-ins. Move fast but build to last.
- Proudly Local, Globally Competent: 100% Malaysian-owned. We know PDPA, Akta Koperasi 1993, local payment gateways, WhatsApp culture, but we ship on global edge infra (Vercel, AWS, Azure).

2.5 Location Strategy

- Cyberjaya: Branding as AI hub, access to talent (MMU, UiTM), proximity to MDEC, low latency to ap-southeast-1 Singapore edge.
- Hutan Melintang, Perak: Lower cost operations, founder roots, coverage for Northern SMEs.
- Remote-First: Team works hybrid, client meetings via WhatsApp video + onsite quarterly.

3. INTELLECTUAL PROPERTY & OWNERSHIP STRUCTURE

3.1 Ownership Principle

Every line of code, design, and process is owned by Duta Integra Solutions Sdn Bhd. We do not resell Hostinger, GoDaddy, or white-label CRMs. This is strategic: ownership = margin = control = ability to offer Merdeka 69% promo without losing money.

3.2 IP Portfolio - Products (Owned)

A. Leish.my (Beauty Booking Marketplace)

- Domain: <https://leish.my/>
- Description: Beauty booking marketplace for Malaysian beauty operators. AI service chatbot handles 70% routine enquiries (price, availability, booking), 24/7 support, 3x efficiency.
- Tech: Next.js, Neon PostgreSQL, Custom AI chatbot (LLM + RAG over service docs), WhatsApp integration
- IP Owned: Full stack, chatbot logic, booking engine, UI/UX
- Metrics: 70% fewer enquiries to human, 24/7, 3x efficiency
- Monetization Path: Commission per booking + SaaS to beauty salons + Case study to sell AI Partner tier
- Status: Live 2026

B. Eastelpro (WiFi Marketing & SIM Platform)

- Preview: <https://eastelpro-vercel.vercel.app/>
- Description: Full-stack WiFi marketing platform for telco/retail: captive portal, PDPA consent logging with timestamp & IP, OTP authentication, affiliate commission engine, SIM management
- Tech: Cloud-native, Vercel Edge, serverless API, PDPA audit trail
- IP Owned: Captive portal, consent module, OTP, affiliate engine, cloud infra
- Metrics: 99.9% uptime, 50% cost save vs legacy, zero downtime migration
- Monetization Path: SaaS per hotspot + White-label to ISPs + Managed IT bundle
- Status: Live 2026

C. AGMX (AGM Operating System)

- Preview: <https://agmx-project.vercel.app/>
- Description: Malaysia's first AI-powered cooperative governance OS. End-to-end AGM management: member registry, e-voting, minutes generation, compliance automation against Akta Koperasi 1993, 4-agent AI Governance Copilot (Compliance Checker, Minutes Writer, Voting Auditor, Risk Flag)
- Tech: Next.js, AI agents orchestration, e-voting cryptography, PDF generation
- IP Owned: Governance logic, compliance rules engine, 4-agent system, e-voting
- Metrics: 98% compliance, 16 AGMs run, 4 AI agents
- Monetization Path: Per cooperative per year + per AGM fee + Government grant (SKM)
- Status: Live 2026, defensible moat due to Akta Koperasi niche

D. DutaConnect (Community Platform)

- Preview: <https://duta-connect.vercel.app/>
- Description: Community platform for Indonesians in Malaysia - forums, jobs, housing, events, services, visa guidance. Treated internally as lead-gen and case-study asset for AI Partner tier, plus future ads revenue
- Tech: Community engine, job board, forum, multi-language (EN/MS/ID)
- IP Owned: Full platform, matching algorithm, content moderation
- Metrics Target: 1K+ registered users, 500+ job postings, 100+ active forums

- Monetization Path: Freemium + Premium listings + Job post fees + Lead-gen for Duta Integra retainers
- Status: Launching Soon

E. Duta Integra Web Platform & Admin Dashboard (Internal Growth Engine)

- Domain: <https://dutaintegra.my>
- Description: Corporate marketing site + powerful admin dashboard bundled with EVERY project tier. This is our secret weapon to convert from agency to software vendor.
- Features Owned:
 - Lead Pipeline: new -> contacted -> closed, with RBAC (admin/staff/client)
 - WhatsApp 1-Click Action: Green button on each lead row: [https://wa.me/\\${phone}?text=Hi \\${name}...](https://wa.me/${phone}?text=Hi ${name}...) - instant follow-up, critical for MY SMEs
 - CSV/Excel Export: Client-side zero-cost export for Meta Custom Audiences, email marketing
 - AI Token Cost-Cap Safeguard: Daily token budget slider, edge middleware checks $\text{sum}(\text{completion_tokens} + \text{prompt_tokens}) \geq \text{dailyCap}$ -> 429 pause. Peace of mind against LLM spam.
 - Security: HttpOnly cookie `di_admin_session`, Edge Middleware auth, no Clerk (zero cost), base64 lightweight crypto
 - DB Schema: users (id, name, email, role, created_at), leads (id, client_name, phone_number, status, created_at), ai_logs (id, user_id FK, prompt_tokens, completion_tokens, model_name, created_at)
- IP Owned: All code, schema, middleware, UI
- Value Prop: Zero-overhead, client loves it, we differentiate from agencies who deliver just a WordPress site

3.3 IP Portfolio - Service Frameworks (Owned)

- Website Framework: Static HTML + Tailwind + Vercel Edge, reusable components (header/footer loader), SEO hardened (robots.txt, sitemap with hreflang en/ms, security.txt)
- Managed IT SOPs: 24/7 monitoring checklist, backup/restore playbook, PDPA audit template, security incident response
- AI Development Kit: Chatbot boilerplate, RAG over PDFs for Internal Knowledge Base, RPA templates, dashboard templates
- Sales Automation Playbook: CRM pipeline design, WhatsApp capture, outreach sequences, handoff to billing

3.4 IP Protection

- Code in private GitHub repo `shamelali/dutaintegraveweb-main` (81 commits)
- .gitignore blocks sensitive files (.pptx, .pdf, .env, .claude/)
- Vercel env vars for secrets (RESEND_API_KEY, TURNSTILE_SECRET_KEY)
- Security headers: HSTS, X-Frame-Options DENY, nosniff, etc via `vercel.json`
- Future: Trademark "Duta Integra Solutions", "AGMX", "Leish", "Eastelpro" with MyIPO

4. PRODUCTS & SERVICES DEEP DIVE

4.1 Service Philosophy: Retainers, Not Jobs

Buyers don't compare eight line items - they pick a tier. Every engagement is built as monthly recurring work, not one-off job. This aligns incentives: we succeed when client stays.

4.2 Entry Product: Business Website

- Price: From RM 2,500 one-off (Merdeka: RM 775 - 69% off)
- Includes: Up to 8 custom pages, mobile-first, WhatsApp lead capture, basic SEO, Google Maps, conversion-ready
- Purpose: Low-friction entry, qualifies lead, natural upsell to Website Care -> Foundation

- Ownership: Built on our framework, not template resold. We own design system.

4.3 Core Retainers (MRR)

TIER 1: FOUNDATION - Managed IT, Security & PDPA

- List: RM 2,000/mo | Merdeka: RM 620 first month (69% off Aug, 63% Sep) | Then RM 2k, month-to-month
- Target: SMEs with 5-30 staff, no IT person, worried about downtime/PDPA
- Includes (Owned Delivery):
 - 24/7 remote helpdesk (WhatsApp + ticket)
 - Network setup, monitoring, management
 - Hardware procurement & maintenance
 - Server management & backups (automated, restore tested)
 - Software licensing & updates
 - Cloud infrastructure (Vercel/AWS/Azure/GCP)
 - Security monitoring & incident response
 - PDPA audit, policy drafting, staff awareness training
 - Monthly IT health report + Dedicated IT engineer
- Free: Initial IT audit
- Gross Margin: ~65%

TIER 2: GROWTH - Foundation + Growth Engine (MOST CHOSEN)

- List: RM 5,300/mo | Merdeka: RM 1,643 first month | Then RM 5.3k
- Formula: Foundation RM2k + Sales Automation RM1.5k + Content RM1k + Ads RM800 = RM5.3k (bundled, cheaper than sum)
- Target: SMEs ready to grow, 10-50 staff, need leads
- Includes Everything in Foundation PLUS:
 - Sales & Workflow Automation (Owned): CRM setup & pipeline design, lead capture from web & WhatsApp, automated follow-up sequences, handoff into helpdesk & billing, monthly pipeline tuning
 - Content Engine (Owned): Monthly content calendar, copy & creative for web/social, SEO-aware blog/landing updates, channel publishing, performance notes
 - Ads Management (Owned): Campaign setup (Meta, Google), audience targeting, creative testing, bid optimization, budget pacing, weekly monitoring, monthly performance report
 - Dedicated account manager
- Value Prop: One partner, one monthly fee, one report. No need for 3 vendors.
- Gross Margin: ~62%

TIER 3: AI PARTNER - Growth + Dedicated AI Sprint

- List: From RM 8,300/mo | Merdeka: From RM 2,573 first month | Then from RM 8.3k
- Formula: Growth RM5.3k + Dedicated AI dev RM3k = RM8.3k+
- Target: SMEs 20-100 staff, want competitive edge via AI, cooperatives, beauty chains, telco
- Includes Everything in Growth PLUS:
 - Dedicated AI development retainer (sprint per half-year = 1 AI system per 6 months)
 - Custom chatbots & virtual assistants (web/WhatsApp)
 - Business process automation (RPA)
 - Machine learning models & data pipelines
 - AI integration into existing systems (CRM, ERP)
 - Natural language tools, AI-powered dashboards

- Priority roadmap & support
- Quarterly strategy reviews
- Example Systems: AI Lead Bot (customer service), Internal Knowledge Base (AI reads company PDFs for staff Q&A), Custom Web App (full product)
- Gross Margin: ~60% (higher value, more dev time)
- Defensibility: AI systems become sticky, high switching cost

4.4 A La Carte (For Stacking or Downsizing)

- Website Care: From RM150/mo - hosting, patches, backups, minor updates - bridge from one-off to retainer
- Sales Automation: From RM1,500/mo
- Content Creation: From RM1,000/mo
- Ads Management: From RM800/mo
- Custom AI Systems: From RM18,000 one-off (Merdeka RM5,580) - productized AI
- Business Intelligence: Launching Next - sales intelligence, campaign analytics, inventory monitoring, AI recommendations

4.5 Productized AI Systems (One-Off with Retainer Option)

- AI Lead Bot: Chatbot on web/WhatsApp, RAG over business knowledge
- Internal Knowledge Base: AI that reads company PDFs, SOPs, for staff Q&A
- Custom Web App: Full product sprint, or financed via AI Partner (RM3k/mo amortized)

5. MARKET ANALYSIS

5.1 Malaysian SME Landscape (2024-2026)

- Total SMEs: 1,173,601 (DOSM 2023) = 97.4% of business establishments
- Contribution: 38.2% GDP, 48% employment
- Digital Adoption: Only 28% have basic website, 12% use CRM, 5% use AI (MDEC Digital Adoption Survey)
- Government Push: RM1B+ in grants (MDEC MD2, SME Corp Digitalization Grant up to RM5k, Geran Digital PMKS Madani)
- Pain: 60% SMEs cite "lack of reliable IT support" and "cost of tech" as top barriers

5.2 TAM / SAM / SOM

- TAM (Total Addressable Market): All MY SMEs needing IT + AI
 - 1.17M SMEs avg RM3k/mo (blended) 12 = RM42.12B/year
 - Even conservative RM2k/mo 12 1.17M = RM28.08B/year
- SAM (Serviceable Available Market): SMEs in Klang Valley, Selangor, Perak, Johor, Penang who are digital-aware, 10-100 staff, RM500k+ revenue
 - Estimated 100,000 businesses
 - 100k RM3k 12 = RM3.6B/year
- SOM (Serviceable Obtainable Market):
 - Year 1: 30 retainers = RM1.49M ARR = 0.04% SAM
 - Year 2: 60 retainers = RM3M ARR = 0.08% SAM
 - Year 3: 100 retainers + 3 SaaS spin-offs = RM5M+ ARR = 0.14% SAM
 - Very conservative, achievable via referrals and Merdeka campaigns

5.3 Market Trends Favoring Us

- PDPA Enforcement Tightening: PDPA 2010 amendments 2024 increase fines up to RM1M. SMEs scared, need PDPA audit - we offer it in Foundation.
- AI Hype to AI ROI: 2023 hype, 2024-2026 SMEs want practical AI (chatbot that reduces enquiries, not fancy demo). Our Leish 70% case study resonates.
- WhatsApp Economy: MY SMEs run on WhatsApp. Our 1-click WhatsApp lead action and WhatsApp chatbots are native.
- Serverless Cost Advantage: Vercel + Neon free tier lets us offer RM0 infra cost to start, vs competitors charging RM500/mo hosting. We pass savings.
- Cooperative Digitalization: 15,000+ cooperatives in MY under SKM, many need AGM digitalization (Akta Koperasi 1993). AGMX is first mover.

5.4 Market Segmentation

- Traditional Brick-and-Mortar (50%): Retail, F&B, beauty salons, workshops. Pain: no IT, leads lost. Pitch: Zero Maintenance, Local Speed, WhatsApp-first. Entry: Business Website RM775 -> Website Care -> Foundation.
- Fast-Paced Startups (30%): E-commerce, tech services, modern services. Pain: scaling, breaking prod, tight budget. Pitch: Git-like DB branching, rapid iteration, RM0 infra. Entry: Growth.
- Cooperatives & Associations (10%): Koperasi, NGOs. Pain: compliance, manual AGM. Pitch: AGMX compliance automation. Entry: AI Partner.
- Telco & ISP (10%): Need WiFi marketing. Pitch: Eastelpro.

6. TARGET CUSTOMER PERSONAS

Persona 1: Kak Siti - Beauty Salon Owner (Traditional SME)

- Age 35, owns 2 branches in Shah Alam, 12 staff, RM80k/mo revenue
- Pain: Staff spends 3 hours/day answering same WhatsApp questions (price, slot). No website, only Instagram. Laptop rosak, no one to call.
- Goal: More bookings, less admin
- Our Offer: Business Website RM775 (Merdeka) + Foundation RM2k (IT support) -> upsell to Growth with AI chatbot like Leish (70% auto)
- Lifetime Value: $RM2k \times 24 \text{ months} = RM48k$ + website $RM2.5k = RM50.5k$

Persona 2: Amir - E-commerce Founder (Startup)

- Age 28, sells streetwear online, RM150k/mo revenue, team of 8 remote
- Pain: Using Shopify + Google Sheets, leads from TikTok Shop lost, ads ROAS dropping, scared to touch live DB when testing new feature
- Goal: Automate sales, better ROAS, ship fast
- Our Offer: Growth RM5.3k - sales automation (CRM), content engine, ads optimization + Neon branching demo
- Lifetime Value: $RM5.3k \times 18 \text{ months} = RM95.4k$

Persona 3: En. Razak - Koperasi Chairman (Cooperative)

- Age 52, Chairman of Koperasi in Perak, 800 members, annual AGM manual, compliance risk
- Pain: Akta Koperasi 1993 compliance complex, e-voting needed, minutes take 2 weeks
- Goal: Compliant, efficient AGM, transparent e-voting
- Our Offer: AGMX SaaS + AI Partner retainer for custom needs
- Lifetime Value: $RM8.3k \times 12 + AGMX \text{ per AGM } RM5k \times 2 = RM109.6k/\text{year}$

Persona 4: Ms. Lim - ISP Marketing Manager (Telco)

- Age 40, manages 50 hotspot locations
- Pain: Need PDPA-compliant WiFi marketing, OTP, affiliate tracking
- Goal: Monetize WiFi, collect leads PDPA-compliant
- Our Offer: Eastelpro SaaS + Foundation IT
- LTV: RM3k/mo * 24 = RM72k

7. COMPETITIVE LANDSCAPE & DIFFERENTIATION

7.1 Direct Competitors

Competitor Type	Examples	Strength	Weakness	Our Advantage
Local IT Shop	ThunderQuote IT, small Cyberjaya	Cheap & local	No AI, no marketing, slow, no PDPA-compliant	PDPA-compliant + IT + PDPA in one
Digital Agency	Agency in KL, freelancers	Good design, ads	No IT support, disappears after project	We stay, 24/7 helpdesk, month-to-month retainer
International SaaS	Zoho, HubSpot, Intercom	Feature-rich	Expensive in USD, no local support	Weater MYR, WhatsApp-first, PDPA-native, local support
Freelancer	Upwork, Fiverr	Cheap	Unreliable, no team, no security	We are company, 100% owned IP, team, audited

7.2 Indirect Competitors

- In-house hiring: Cost RM5k-8k per IT staff, no AI skill. We offer dedicated engineer at RM2k.
- Doing nothing: Biggest competitor. Our free audit overcomes inertia.

7.3 Our Moats (Defensibility)

- Owned IP Stack: Competitors resell. We own. Margin control.
- AI + IT Combined: One vendor. Simpler, cheaper, better coordinated. No one else in MY SME space does both well.
- PDPA-Native: Every product has consent logging, audit trail. Built for MY law, not US.
- WhatsApp-First: 1-click WhatsApp action, WhatsApp chatbots, WhatsApp lead capture. MY runs on WhatsApp.
- Zero-Cost Infra Advantage: Vercel + Neon free tier = we can offer RM0 infra to start, competitors can't. When client scales, we upgrade to paid but still cheaper due to serverless (sleep when idle).
- Niche Dominance - AGMX: Only AI-powered AGM OS for Koperasi in MY. Akta Koperasi 1993 is complex, we coded rules engine.
- Month-to-Month Trust: No lock-in. Competitors lock 12 months. We win trust, then retain via value.
- Proof Products: Leish, Eastelpro, AGMX are live, not slides. Client can preview.

7.4 Positioning Statement

"For Malaysian SMEs who need both reliable IT and practical AI, Duta Integra Solutions is the AI-first IT partner based in Cyberjaya that delivers enterprise-grade systems on a month-to-month retainer, because we own our IP, understand PDPA, and stay after go-live - unlike agencies who disappear and IT shops who can't do AI."

8. BUSINESS MODEL & MONETIZATION

8.1 Revenue Streams

- MRR Retainers (70% of revenue target): Foundation, Growth, AI Partner. Core, predictable, high margin.
- One-Off Projects (15%): Business Website, Custom AI Systems. Used as CAC (customer pays to become lead) + cash flow.

- SaaS Spin-Offs (10% future): Leish SaaS to salons, Eastelpro SaaS to ISPs, AGMX SaaS to cooperatives, DutaConnect premium. High margin, scalable.
- A La Carte Add-Ons (5%): Website Care, Sales Automation standalone, etc. For clients not ready for full retainer.

8.2 Business Model Canvas

- Key Partners: Vercel, Neon, Resend, Cloudflare Turnstile, Meta, Google, MDEC, SME Corp
- Key Activities: AI dev, Managed IT, Cloud management, Content & Ads, Sales automation, PDPA audit
- Key Resources: Owned IP (4 products + frameworks), Team (tech lead, IT support, founder), Vercel/Neon infra, Brand (dutaintegra.my)
- Value Propositions: One partner for AI+IT, PDPA-compliant, WhatsApp-first, transparent pricing, month-to-month, 3-day proposal, 24/7 support
- Customer Relationships: Dedicated engineer/account manager, monthly health/performance reports, WhatsApp group, quarterly strategy reviews (AI Partner)
- Channels: Website SEO, WhatsApp, Content (case studies), Merdeka promo, Referrals, MDEC events, Direct outreach
- Customer Segments: Traditional SMEs, Startups, Cooperatives, Telco/ISP
- Cost Structure: Staff (60%), Tools (Resend, domains - 5%), Marketing (15%), Office/ops (10%), Vercel/Neon paid tier when scaled (10%)
- Revenue Streams: MRR, One-offs, SaaS

8.3 Why MRR-First Works

- Predictable cash flow
- Higher valuation (ARR 5-10x vs project revenue 1x)
- Aligns incentives (we want client to stay, so we deliver value)
- Owned IP makes MRR sticky (AI chatbot becomes critical)

9. PRICING STRATEGY & UNIT ECONOMICS

9.1 Pricing Philosophy

- Transparent, in MYR, on website (unlike competitors who hide)
- Bundled retainers cheaper than sum of parts to encourage upgrade
- Month-to-month to reduce perceived risk
- Merdeka promo creates urgency and lowers barrier, but list rate is anchor
- Free audit + 3-day proposal = low friction, high trust

9.2 Detailed Pricing (as of Aug 2026)

Entry:

- Business Website: From RM2,500 one-off (Merdeka Aug: RM775 = 69% off, Sep: RM925 = 63% off)
- Value: Up to 8 pages, mobile-first, WhatsApp capture, SEO, Maps

Retainers:

- Foundation: RM2,000/mo list, RM620 first month Merdeka Aug (69% off), RM740 Sep (63% off). Then RM2k. Includes free IT audit.
- Growth: RM5,300/mo list, RM1,643 first month Aug, RM1,961 Sep. Then RM5.3k. Most chosen.
- AI Partner: From RM8,300/mo list, From RM2,573 first month Aug, From RM3,071 Sep. Then from RM8.3k. Includes 1 AI system per half-year.

A La Carte:

- Website Care: From RM150/mo
- Sales Automation: From RM1,500/mo
- Content: From RM1,000/mo
- Ads: From RM800/mo
- Custom AI Systems: From RM18,000 one-off (Merdeka RM5,580 Aug, RM6,660 Sep) - AI Lead Bot, Internal Knowledge Base, Custom Web App

9.3 Unit Economics

Foundation Tier:

- Price: RM2,000/mo
- Cost to Serve: ~RM700 (engineer 5h * RM80 + tools RM100 + infra RM0-200)
- Gross Margin: RM1,300 = 65%
- CAC: ~RM500 (ads + audit time)
- Payback: <1 month
- LTV (24 months avg): RM48,000
- LTV/CAC: 96x (excellent)

Growth Tier:

- Price: RM5,300/mo
- Cost: ~RM2,000 (engineer 8h + content 10h + ads specialist 5h + tools RM300)
- Gross Margin: RM3,300 = 62%
- CAC: ~RM1,000
- Payback: <1 month
- LTV (18 months avg): RM95,400
- LTV/CAC: 95x

AI Partner:

- Price: RM8,300/mo
- Cost: ~RM3,300 (Growth cost + AI dev 15h)
- Gross Margin: RM5,000 = 60%
- CAC: ~RM1,500
- LTV (12 months avg): RM99,600
- LTV/CAC: 66x

Blended Gross Margin Target: 62-65%

9.4 Merdeka Promo Math

- 69% off first month means we lose margin first month but gain client.
- Example Growth: First month RM1,643 vs cost RM2,000 = -RM357 loss. But if client stays 18 months, total profit = (RM1,643 - RM2k) + 17*(RM5.3k - RM2k) = -357 + 56,100 = RM55,743 profit. Worth it.
- Urgency: "August 69%, September 63%, then list rate" drives action.

10. TECHNOLOGY STACK & INFRASTRUCTURE (Zero-Cost Blueprint)

10.1 Philosophy

We practice what we preach: enterprise-grade but cost-efficient. Our stack is serverless, edge-first, and starts at RM0.

10.2 Stack by Project Type

Layer	WordPress Builds (for legacy SME)	Next.js / Custom Builds (Our Prefer
Frontend	Elementor / WPBakery	React.js / Next.js 14 App Router
Styling	Bootstrap / Themes	Tailwind CSS
Backend	PHP / WooCommerce	Node.js / Laravel (but primarily Next.js
Database	MySQL	PostgreSQL (Neon Serverless)
ORM	-	Drizzle ORM
CMS	WordPress + ACF Pro + White Label CMS	Custom Premium Dashboard (Owned)
Hosting	Exabytes / Shinjiru (MY)	Vercel (ap-southeast-1 Singapore)
Auth	WordPress auth	Custom Edge Middleware + HttpOnly cookie
Email	-	Resend API
Bot Protection	-	Cloudflare Turnstile
SEO	Yoast	GA4, GSC, Meta Pixel, GTM, robots.txt, s

10.3 Infrastructure Blueprint - Zero-Cost Setup

- Vercel Hobby Tier: Global Edge CDN, Serverless Functions, Edge Middleware, Analytics. RM0.
- Neon Free Tier: Serverless PostgreSQL, WebSocket pooling, Git-like branching (instant DB branching for testing without touching prod). RM0.
- Region: ap-southeast-1 (Singapore) - sub-40ms latency to Malaysia, better than US.
- Monthly Cost at Start: RM0. When we exceed free tier (e.g., 100k rows, 10k function invocations), we upgrade to Pro (~RM80-200/mo) but still far cheaper than traditional VPS RM500/mo that sleeps.
- Value Prop to Client: "Serverless architecture that sleeps when traffic idle - zero massive monthly server fees. Your website hosted on high-performance regional edge servers pointing directly to Malaysia."

10.4 Security Architecture (Owned)

- Auth Flow: Request to /admin/* -> Edge Middleware (src/middleware.ts) checks di_admin_session cookie -> If no cookie, redirect to /admin/login -> If cookie, crypto helper (src/lib/auth.ts) getVerifiedAdmin() cross-ref Neon DB -> Access granted
- Features: HttpOnly cookie (XSS-proof), Edge-level blocking (protects Neon DB limits), base64/buffer lightweight crypto, zero third-party auth cost (no Clerk)
- Email API Hardening: Hardcoded TO (hello@dutaintegra.my), origin check, rate limit 5/min, honeypot field, Turnstile verification, validation
- Security Headers via vercel.json: Strict-Transport-Security, X-Frame-Options DENY, X-Content-Type-Options nosniff, Referrer-Policy, etc.
- Git Security: .gitignore blocks .pptx, .pdf, .env, .claude/, Web/ duplicate, admin.html. GitHub Actions security.yml runs gitleaks, npm audit, blocks sensitive commits.

10.5 Database Schema (Owned)

3 Core Tables (Drizzle ORM):

- users: id, name, email, role (admin/staff/client), created_at
- leads: id, client_name, phone_number, status (new -> contacted -> closed), created_at
- ai_logs: id, user_id FK -> users, prompt_tokens, completion_tokens, model_name, created_at

Lead Pipeline: [new] -> [contacted] -> [closed]

RBAC: admin (full), staff (operational), client (limited portal)

10.6 Why This Stack Wins for MY SMEs

- Traditional agency: cPanel + MySQL + WordPress = slow, RM500/mo, downtime, no branching.
- Us: Edge + Serverless + Branching = fast, RM0 start, instant preview deployments, zero maintenance.

11. GO-TO-MARKET STRATEGY

11.1 Positioning

AI-first IT partner, not IT shop, not agency. One partner, three retainers. Proudly Malaysian, PDPA-aware, WhatsApp-first.

11.2 Channels

- Website & SEO (Owned): dutaintegra.my - transparent pricing, case studies (Leish, Eastelpro, AGMX), free audit CTA. SEO: "AI chatbot Malaysia", "Managed IT Cyberjaya", "PDPA compliance SME", "Website RM775". Hreflang en/ms, sitemap, robots.txt.
- WhatsApp (Primary): All CTAs to WhatsApp. Admin dashboard WhatsApp 1-click. Broadcast Merdeka promo to SME databases. WhatsApp Status case studies.
- Content Marketing (Owned): Case study deep dives: "How Leish reduced 70% enquiries", "AGMX: 98% compliance", "Eastelpro 99.9% uptime". Blog, LinkedIn, Facebook.
- Merdeka Promo Campaign (Seasonal): August 69% off, September 63% off. Flag (Jalur Gemilang), urgency, social proof. Landing page: /pricing#business-website
- Referral Program: 1 month free for referrer and referee after 3 months stay. SMEs trust word-of-mouth.
- Direct Outreach: Cold WhatsApp + email to beauty salons, cooperatives, ISPs. Personalized Loom video audit.
- Partnerships: MDEC, SME Corp, SKM (cooperatives), Exabytes (referral), local business associations.
- Events: Cyberjaya tech meetups, SME expos, Koperasi fairs.

11.3 Audience-Specific Messaging (from AUDIENCE_AND_FEATURES_PLAN)

- Traditional Brick-and-Mortar SMEs: Fear complicated tech, high hosting costs, lock-in. Pitch: "Zero Maintenance" & "Local Speed". Copy: "Your website hosted on high-performance regional edge servers pointing directly to Malaysia (sub-40ms latency). Powered by serverless that sleeps when idle - zero massive monthly server fees."
- Fast-Paced Startups: Fear scaling, breaking prod, tight budget, no pipeline visibility. Pitch: "Git-like Database Branching" & "Rapid Feature Iteration". Copy: "Leverage instant database branching via Neon - deploy new features in isolated test environments without touching live DB. Zero-cost setup via Vercel Hobby + Neon Free Tier (RM0 monthly infra while you scale)."

11.4 Funnel

Awareness (SEO, Content, Merdeka Ads) -> Interest (Free Audit Landing) -> Consideration (3-day Proposal) -> Conversion (Foundation/Growth) -> Retention (Monthly Reports, Dedicated Engineer) -> Expansion (Growth -> AI Partner, SaaS add-ons) -> Referral

12. SALES PROCESS & FUNNEL

Step 1: Free Audit (No Obligation, No Sales Pressure)

- Client books via website / WhatsApp
- We assess current IT setup or AI readiness: website speed, security, PDPA gaps, lead flow, automation opportunities

- Deliverable: 1-page audit PDF + Loom video

Step 2: Proposal (Within 3 Working Days)

- Scope, timeline, fixed pricing, retainer recommendation
- Includes case study relevant to their industry (e.g., beauty -> Leish)
- Call to present proposal

Step 3: Delivery (Weekly Check-ins, Full Transparency)

- Onboarding: access, kickoff, WhatsApp group
- Weekly updates, staging preview via Vercel
- Go-live with monitoring

Step 4: Support (Ongoing, Part of Retainer)

- Monthly health/performance report
- Dedicated engineer/account manager
- Quarterly strategy review (AI Partner)

Sales Metrics:

- Audit -> Proposal: 80% (we propose to all audited)
- Proposal -> Close: 30-40% target
- Average Sales Cycle: 7-14 days
- CAC: RM500-1,500
- Payback: <1 month

Tools:

- Admin Dashboard lead pipeline
- WhatsApp 1-click follow-up
- CSV export for Meta Custom Audiences retargeting

13. OPERATIONS PLAN

13.1 Delivery Model

- Remote-first, Cyberjaya hub for meetings
- Vercel preview deployments for client feedback
- SOPs for IT support (monitoring, backup, incident)
- RBAC in admin dashboard: admin (founder), staff (tech lead, support), client (limited view)

13.2 Service Delivery Workflow

For Foundation:

- Day 1: Audit, access
- Day 2-3: Proposal
- Day 4-7: Onboarding, monitoring setup, backup, security hardening, PDPA docs
- Ongoing: 24/7 monitoring, helpdesk, monthly report

For Growth:

- Includes Foundation + Week 2: CRM setup, pipeline design, WhatsApp capture + Week 3: Content calendar, first batch + Week 4: Ads campaign launch + Ongoing: weekly monitoring, monthly performance report

For AI Partner:

- Includes Growth + AI Sprint: Week 1-2: Discovery, data gathering + Week 3-6: Build chatbot/automation + Week 7: Integration, training + Week 8: Go-live + Ongoing: quarterly strategy

13.3 Quality Assurance

- All code reviewed by Tech Lead
- Vercel preview before prod
- PDPA checklist for every project
- Security headers, rate limiting, Turnstile
- Backup tested monthly

13.4 Tools

- Dev: GitHub, Vercel, Neon, Drizzle, Resend, Cloudflare
- Project: WhatsApp, Google Meet, Notion (SOPs)
- Monitoring: Vercel Analytics, UptimeRobot, custom health checks
- Marketing: GA4, GSC, Meta Pixel, GTM

14. TEAM & ORGANIZATION

14.1 Current Team (As of Aug 2026)

- Founder & CEO: Strategy, business development, client relationships, fundraising, PDPA & compliance. Background: Malaysian SME ecosystem, business development.
- Tech Lead: AI development, architecture, Vercel/Neon/Next.js stack owner, code review, security. Owns all owned IP.
- IT Support Specialist: Managed IT, monitoring, client support, backups, helpdesk. First line for Foundation clients.

14.2 Hiring Plan (Next 12 Months)

- Q3 2026: Sales & Account Manager (1) - own Growth retainer delivery, monthly reports, upsell. Content & Ads Specialist (1) - own content engine & ads.
- Q4 2026: Junior AI Developer (1) - assist Tech Lead, chatbot building.
- Q1 2027: Junior IT Support (1) - scale Foundation.

14.3 Culture

- Clarity over jargon, partnership over transaction, speed with substance, proudly local
- Remote-first, async, weekly check-ins, monthly all-hands
- Documentation: SOPs in Notion, code in GitHub, decisions in writing

14.4 Advisors (Future)

- PDPA lawyer, MDEC mentor, Koperasi expert for AGMX, Beauty industry advisor for Leish

15. FINANCIAL PLAN & PROJECTIONS (3-YEAR)

15.1 Assumptions

- Pricing: Foundation RM2k, Growth RM5.3k, AI Partner RM8.3k (list, before Merdeka)
- Churn: 5% monthly (conservative for month-to-month, mitigated by value)
- Growth: Net new retainers: 2-3 per month Year 1, 3-4 Year 2, 4-5 Year 3

- One-offs: 20 websites Year 1, 30 Year 2, 40 Year 3 + 5 AI systems Year 1, 10 Year 2, 15 Year 3
- SaaS: Year 2 launch Leish SaaS RM199/mo, Eastelpro RM299/mo, AGMX RM499/mo per coop
- Costs: Staff, tools, marketing, infra. Gross margin 60-65%, net margin 20-30% after scaling
- Merdeka promo impact: Year 1 first month discounted, but LTV compensates

15.2 Year 1 Projection (Conservative - 30 Retainers)

Revenue Stream	Calculation	Amount (RM)
MRR at EOY	15 Foundation *2k +10 Growth*5.3k +5 AI*	124,500 MRR
ARR	124.5k *12	1,494,000
Avg MRR during year (ramp)	~60k avg *12	720,000
One-offs Websites	20 * RM2,500	50,000
One-offs AI Systems	5 * RM18,000	90,000
Total Year 1 Revenue		**~860,000 (ramp) to 1,634,000 (if 30 at
Conservative Recognized		**RM 860,000**

Costs Year 1:

- Staff (3-5 people): RM300,000
- Tools & Infra (Vercel Pro, Neon, Resend, domains): RM20,000
- Marketing (Ads, content): RM80,000
- Ops (office, misc): RM40,000
- Total Costs: RM440,000
- EBITDA: RM420,000 (48% margin) - high due to owned IP

15.3 Year 2 Projection (60 Retainers + SaaS)

- MRR: 30 Foundation 2k=60k +20 Growth5.3k=106k +10 AI*8.3k=83k =249k MRR
- ARR: RM2,988,000
- Avg MRR ~180k 12 = RM2.16M + one-offs (30 websites 75k +10 AI 180k)=255k + SaaS (100 Leish 19912=238.8k +50 Eastelpro29912=179.4k +20 AGMX499*12=119.76k)=537.96k
- Total Year 2: ~RM2.95M
- Costs: Staff 6-8 RM600k + Tools 40k + Marketing 150k + Ops 80k = RM870k
- EBITDA: ~RM2.08M (70% margin with SaaS)

15.4 Year 3 Projection (100 Retainers + SaaS Scale)

- MRR: 502k=100k +305.3k=159k +20*8.3k=166k =425k MRR
- ARR: RM5.1M
- Avg MRR ~330k12=3.96M + one-offs (40 websites 100k +15 AI 270k)=370k + SaaS (300 Leish19912=716.4k +150 Eastelpro29912=538.2k +50 AGMX499*12=299.4k)=1.554M
- Total Year 3: ~RM5.88M
- Costs: Staff 10-12 RM1.2M + Tools 80k + Marketing 250k + Ops 150k = RM1.68M
- EBITDA: ~RM4.2M (71% margin)

15.5 Unit Economics Summary

- Blended CAC RM1k, LTV RM50k-100k, LTV/CAC 50-100x, Payback <1 month
- Gross Margin 60-65% retainers, 80%+ SaaS
- Net Margin scaling from 20% to 40%+ due to zero-cost infra and owned IP

15.6 Cash Flow

- Bootstrapped, no debt
 - MRR provides stable cash flow
 - Merdeka promo creates short-term dip but long-term gain
 - One-offs fund CAC
-

16. MARKETING & GROWTH STRATEGY

16.1 Content Strategy (Owned)

- Pillar 1: Case Studies: Leish 70% automation, Eastelpro 99.9% uptime, AGMX 98% compliance. Format: blog + video + carousel + WhatsApp Status.
- Pillar 2: PDPA Education: "PDPA 2024: What SMEs Must Do", checklist, audit template. Lead magnet.
- Pillar 3: AI for SME Practical: "AI chatbot that actually reduces cost", "How to not get scammed by AI agency". Build trust.
- Pillar 4: Behind the Scenes: Cyberjaya team, tech stack (Vercel+Neon), why month-to-month.

16.2 SEO Strategy

- Keywords: "AI chatbot Malaysia", "Managed IT Cyberjaya", "PDPA compliance SME", "Website RM775", "Koperasi AGM system", "WiFi marketing Malaysia", "Beauty booking system Malaysia"
- On-page: Title, meta, hreflang en/ms, sitemap.xml, robots.txt, og-share.jpg
- Off-page: Backlinks from client sites (Leish, Eastelpro), MDEC directory, SME Corp

16.3 Paid Ads

- Meta Ads: Target SME owners, 28-55, interests: SME, business, beauty, cooperative. Creative: Merdeka promo, case study metrics. Retarget via CSV export -> Custom Audiences.
- Google Ads: Search "IT support Cyberjaya", "AI chatbot Malaysia", "website developer Malaysia"
- Budget: RM3k-5k/mo Year 1, ROI via Growth tier close

16.4 WhatsApp Growth Engine

- Primary CTA everywhere
- Admin dashboard 1-click WhatsApp reply = speed = close
- Broadcast list: 500 SMEs, weekly value + promo
- WhatsApp Channel for updates

16.5 Referral & Partnership

- Referral: 1 month free for both after 3 months
- Partnership: Exabytes referral fee, MDEC mentor, SME associations
- DutaConnect as lead-gen: community members need IT/AI -> funnel to retainers

16.6 Merdeka Campaign (Q3)

- Theme: "Merdeka 69% - AI untuk SME Malaysia"
 - Assets: Jalur Gemilang flag, 69% off badge, countdown
 - Channels: Website band, social, WhatsApp broadcast, email
 - Offer: 69% off first month retainers + one-offs in August, 63% September
 - Goal: 10 new retainers in 2 months
-

17. RISK ANALYSIS & MITIGATION

Risk	Likelihood	Impact	Mitigation
Client Churn (month-to-month)	Medium	High	Monthly health reports, dedicated engine
LLM Cost Spikes (bot spam)	Medium	Medium	**Owned:** AI Token Cost-Cap safeguard i
Key Person Dependency (Tech Lead)	Medium	High	Document SOPs, code in GitHub, hire juni

**Economic Downturn SME Cut IT B	Medium	Medium	Offer Foundation RM2k as essential (not
Vercel/Neon Pricing Change	Low	Medium	Stack is portable to AWS/Azure/GCP (we a
**PDPA Fine to Client Blamed on Us	Low	High	PDPA audit, policy drafting, staff train
Founder Burnout	Medium	Medium	Hire sales/account manager, remote-first

18. ROADMAP & MILESTONES (2026-2029)

Q3 2026 (Now - Merdeka Launch)

- [] Launch Merdeka 69% campaign, close 10 retainers
- [] Ship DutaConnect Beta (1K users)
- [] Launch Business Intelligence dashboards (next service)
- [] Hire Sales & Account Manager
- [] Trademark filing MyIPO

Q4 2026 (Scale to 20 Retainers)

- [] 20 retainers MRR ~80k
- [] AGMX v2 with SKM compliance update
- [] Referral program launch
- [] Case study videos (Leish, Eastelpro, AGMX)
- [] Content engine: 2 blogs/week, 3 social/week

Q1 2027 (30 Retainers)

- [] 30 retainers MRR 124.5k
- [] Hire Junior AI Dev + Junior IT Support
- [] Introduce annual prepaid discount (12 months = 10 months price = 2 months free)
- [] Launch Leish SaaS pilot to 20 salons

Q2 2027 (Productize)

- [] Productize Eastelpro & Leish as standalone SaaS
- [] Explore MDEC MD2 grant, Cradle, SME Corp
- [] Partnership with Exabytes, MDEC
- [] 40 retainers

Q3-Q4 2027 (60 Retainers)

- [] 60 retainers MRR 249k
- [] SaaS: 100 Leish, 50 Eastelpro, 20 AGMX
- [] Team 8-10
- [] Office in Cyberjaya (small)

2028 (100 Retainers + Regional)

- [] 100 retainers MRR 425k, ARR RM5.1M
- [] SaaS scale: 300 Leish, 150 Eastelpro, 50 AGMX
- [] Total revenue ~RM5.88M
- [] Explore ID market via DutaConnect (Indonesians in MY -> ID expansion)
- [] Team 12, EBITDA ~RM4.2M

2029 (Vision)

- [] 150 retainers, 3 SaaS profitable, DutaConnect 10K users
- [] Potential Series A or stay profitable bootstrapped
- [] Consider acquisition or continue as profitable SME champion

19. KPIs & METRICS

North Star: MRR & Net MRR Retention

Sales:

- # Free Audits per month (target 20)
- Audit -> Proposal % (target 80%)
- Proposal -> Close % (target 30-40%)
- CAC (target <RM1,500)
- Sales cycle (target <14 days)

Retention:

- MRR Churn % (target <5% monthly)
- Net MRR Retention (target >100% via upsell Foundation->Growth->AI Partner)
- LTV (target >RM50k)
- LTV/CAC (target >50x)

Product:

- Uptime (target 99.9% - via Vercel)
- Lead response time (target <1 hour via WhatsApp 1-click)
- AI chatbot automation % (target 70%+ like Leish)
- PDPA audit pass rate (target 100%)

Marketing:

- Website traffic (target 5k/mo Year 1)
- WhatsApp inbound leads (target 30/mo)
- Content pieces (target 8/mo)
- Referral % (target 30% of new clients)

Financial:

- MRR, ARR, Gross Margin (target 60%+), EBITDA, Cash runway

Dashboard: Our Admin Dashboard tracks leads, status, AI logs, plus Vercel Analytics, GA4

20. LEGAL, COMPLIANCE & PDPA

20.1 Company Structure

- Sdn Bhd, 100% Malaysian-owned, Bumiputera
- Registered in Malaysia, tax compliant, SST if applicable

20.2 PDPA Compliance (Our Differentiator)

- Malaysia Personal Data Protection Act 2010 + 2024 amendments
- Our delivery includes:
 - PDPA audit & gap analysis
 - Policy drafting (Privacy Notice, Consent Form)
 - Consent logging with timestamp, IP, purpose (as in Eastelpro)
 - Staff security awareness training
 - Data breach response plan
 - Ongoing monitoring
- We practice: HttpOnly cookies, encryption, minimal data collection, retention policy, security.txt, robots.txt blocking /api/, /admin

20.3 Contracts

- Month-to-month, no lock-in, 30-day termination notice
- Clear scope, fixed pricing, IP ownership clause (client owns their data, we own framework IP, client gets license to use)
- NDA for sensitive projects

20.4 IP Protection

- All code owned by Duta Integra Solutions
- Client deliverables built on owned framework, client gets usage rights, not framework ownership (unless custom contract)
- Trademark future: Duta Integra Solutions, AGMX, Leish, Eastelpro

20.5 Insurance (Future)

- Professional indemnity, cyber insurance as we scale
-

21. FUNDING REQUIREMENTS & USE OF FUNDS (Optional - For Grant/Investor)

Current Status: Bootstrapped, profitable, no debt. Seeking optional grant or seed to accelerate SaaS spin-offs.

If Raising RM500k Seed (Example):

Use	Amount	%	Details
Team	RM250k	50%	Hire Sales Manager, Content Specialist,
Marketing & Sales	RM100k	20%	Meta/Google Ads, content production, Mer
Product & SaaS	RM100k	20%	Leish SaaS, Eastelpro SaaS, AGMX v2, BI
Ops & Legal	RM50k	10%	Trademark, PDPA lawyer, office, tools (V
Total	**RM500k**	**100%**	18-month runway to 60 retainers + SaaS

Expected Return: Year 2 revenue RM2.95M, EBITDA RM2.08M, 4x+ return on RM500k

Alternative: No funding, grow organically via MRR reinvestment (slower but profitable from Day 1). Both viable.

22. APPENDICES

22.1 Product Screenshots & Links

- Leish: <https://leish.my/> - Beauty marketplace, AI chatbot 70%
- Eastelpro: <https://eastelpro-vercel.vercel.app/> - WiFi marketing, PDPA consent
- AGMX: <https://agmx-project.vercel.app/> - AGM OS, 4-agent copilot
- DutaConnect: <https://duta-connect.vercel.app/> - Community platform
- Main Site: <https://dutaintegra.my> - Pricing transparent, Merdeka band

22.2 Technical Architecture Diagram

22.3 Pricing Table (For Reference)

- Business Website: RM2,500 (Merdeka RM775)
- Website Care: RM150/mo
- Foundation: RM2,000/mo (Merdeka RM620)
- Growth: RM5,300/mo (Merdeka RM1,643)
- AI Partner: From RM8,300/mo (Merdeka From RM2,573)
- Sales Automation: RM1,500/mo
- Content: RM1,000/mo
- Ads: RM800/mo
- Custom AI: From RM18,000 (Merdeka RM5,580)

22.4 Team Bios (Short)

- Founder & CEO: Strategy, BD, client relationships, 100% Malaysian, SME ecosystem
- Tech Lead: AI, architecture, Vercel/Neon, owns IP
- IT Support Specialist: Managed IT, monitoring, helpdesk

22.5 Contact

- Website: <https://dutaintegra.my>
- Email: hello@dutaintegra.my
- WhatsApp: +60 11-5403 4051
- Location: Cyberjaya, Selangor + Hutan Melintang, Perak
- Calendly: [Book free audit via /contact](#)

CONCLUSION

Duta Integra Solutions is not an agency. We are a product company that monetizes via retainers. We own everything we sell - from Leish to Eastelpro to AGMX to DutaConnect to our Admin Dashboard to our Vercel+Neon framework. This ownership gives us margin, speed, and defensibility.

For Malaysian SMEs, we are the first and only partner that combines AI + IT + Cloud + Security + PDPA + Sales + Content + Ads under one roof, month-to-month, with transparent pricing and a team that stays after go-live.

We have built the IP. We have proven the model with 5+ products. Now we scale distribution: 30 retainers Year 1, 60 Year 2, 100 Year 3, plus SaaS spin-offs.

All services and products are developed and owned by Duta Integra Solutions Sdn Bhd. 100% Malaysian-owned. Built in Cyberjaya, for Malaysian SMEs.

This business plan is confidential and prepared for internal use and selected investors/partners of Duta Integra Solutions Sdn Bhd. All IP is owned by Duta Integra Solutions.

Prepared: 21 August 2026
